

she will turn up her heels
I have seen but little
of the line since you
left but hope soon
to call on them.
Henry Wilton I hear
set his foot very
badly yesterday
much like Mrs.
Smith's do not
know the particulars
only that they sent
to the doctor per
a surgeon.
Ershway was
married in
Praterra by a
Justice.
My sheet is full
I think to go the
mails good bye
another

with the water & mud every where we have had
one beautiful & fair day with a good prospect
for another & I grieve for a good spell of weather.
It is now full time that corn was being planted
I yet I do not know of a field that is plowed.
But there is time enough yet to do the work &
raise crops if we shall have good weather hereafter.
Mr. Swift called in yesterday morning told us
of this conclusion about exchanging with Mr. Brog.
It seems that his ride to Ottumwa must in
evitably be in the night & Mr. Brog's ride from
Danville here ^{in the night} unless two trips are made with
the team to O. which now can't be thought of.
For the rest of it if we should now have good
weather & the roads become good I told Mr. Swift
that a delegate must be appointed here who
has one horse & buggy who would go on Tuesday
through to Mt. Pleasant with Mr. Brog & return
on Thursday with himself. ^{Mr. S.} Were I going to Mt.
Pleasant in good going I would go with my own
conveyance any how. Then I could go & come as I
please. He supposed that it would of necessity have
to be 3 night trips made which would be bad if the
roads are not as now. I had rather if men can plow
I have nearly finished my share that one of them

I told him further that there are no trains in the day time, one leaving Danville about 2 1/2 p.m. for the west & an eastern train in the am, which could be taken if the rains should continue so that farmers could not work in the fields, some horse would not be sufficient to take 2 in a buggy through. Well he said if this is so, we will consider it an open question still. I wait for developments. There is another thing in this connection Mrs. Swift is going as she can to Montrose to stay perhaps work with Anna. Mr. Swift in his delicate sensibility, hated to put Mr. B. out to us over Mattie for entertainment. Taking all things into consideration, this is not a convenient time for Mr. Swift to make an exchange, I get I am sure he would like to make an exchange.

To day I hope to get some seeds into the garden. A lot of things done. The workmen will be ready to raise the stump next week. Birch & carpenters are at work on it. Mother will write to you soon. I hope you will think that I take my house work very cool to leave every thing in the morning. So we see but it is of not much consequence if the work waits a little. We are very glad that you are doing so well in school & that you are happier than before. You must be careful & not take cold or get overdone if your school is not out until the 12 iday after.

Dear Daughter, I hope you will think that I take my house work very cool to leave every thing in the morning. So we see but it is of not much consequence if the work waits a little. We are very glad that you are doing so well in school & that you are happier than before. You must be careful & not take cold or get overdone if your school is not out until the 12 iday after.

will you be able to go with Mrs. Bellamy the Monday afternoon following she thinks she must pay account of Stibelall his mother is anxious to have her with her Mrs. B. is quite poorly hardly able to get to school but Lee is obliging we do it. Mrs. B. is sick to mother's sister & sister & sister with as had a man's great. Uncle James & Aunt B. called yesterday & I hope they will have them with them. They will be here. Charlie boy much. Mrs. Swift C. said C. was not contented with the boy at home & far on he wanted to see more. He would be willing to
