

I will send you the 16. Eye
containing an account of
the bridge in Danville
I hear from this. At
the same time there was
one in Quincy. It
I saw Mrs. Cooper last one
I always carry the boy
I will with some home
with my mother's things, Mrs.
I hope you & your
Dr. Cochran from Danville
I will give the best
kind of a wagon & to
the person to some or
large amounts, Mananoni.
I am in no news for it
All our love
Father

Mr. Cochran (Dentist) from
Burlington is spending 2 or 3 days in town
doing up a little work in his line & I am
waiting for him to make a call to examine
your in this month. I ascertain whether she
can have an "impression" taken & can also wear
a "plate" in her mouth without causing trouble.
If she can have an impression taken all right
we shall expect she can wear the plate & this
with it if she can we shall have a full set
put in in vacation. She is not willing to run
the risk while we have boards & she has so
much to do. Our plan will be to go to Kopsent's
& stop on the way ^{up} for one trip, & on the way
home for another trip. I not cause much
trouble.

Old man Montandon died yesterday, p.m. &
is being buried at this hour, 4 p.m. so there is
another of our old citizens gone & another widow
added to the already large number present among
us. A very few years more must make a great
change among the citizens of our little place, there
are so many aged persons, or at least elderly ones
as compared with those in younger years.

Mrs. Spaulding was in after I sent my last to you

I gave mother a talk to her about Mr. Brooks leaving home with his wife & leaving you girls alone in that house. & she (Mrs. S.) said you ought not on any condition to stay alone at all in that house. According to Mrs. S.'s ideas I was ~~not~~ ^{not} positive about it, in my last. (I owe you a day more, at the longest, & you will be through ready to come home. As there will be no moon at that time, & it may be bad weather or bad going, it may be best for you to plan to start on Sat. morn. by the 7 o'clock train. It might be difficult to see ^{all} your baggage in the night & dark, besides the risk of the travelling. We could be at home for dinner on Sat. This for a thought. It seems to me that we have never misfed you as much as now. I have never been so anxious for the time to come for you to come home. It sometimes seems a little lonely. The Miss Mother often says she can hardly think of spending the rest of her life alone, unless you should get married. Then of course both of us should submit, & without a murmur. My jaw & eye troubles me some & day, so that I cannot be out much in this sun. I will wait for the rest till morning. Morn. beautiful. The Dr. called in & the conclusion is to clean up the lower teeth & heal up the gums, ^{now} & put in an upper set in vacation. We shall go to W. & back each way & get the teeth & do things need to be done on the sensitive parts.
